### Agriculture Theft and Crime Cost Hawaii Farm Producers \$12.8 million in 2024

The total value of theft and vandalism losses, as well as security costs, from Hawaii farms is estimated at \$12.8 million. Total theft of farm commodities, materials, equipment, and other property is pegged at \$2.30 million. Statewide vandalism cost to farms in Hawaii totaled \$970 thousand. Total security costs to prevent theft and/or vandalism totaled \$9.54 million.

The survey showed 2,312 incidents of theft, 759 incidents of vandalism, and 9,224 trespassing incidents during 2024. Of these, 644 were reported to law enforcement. The number of arrests resulting from the reported incidents is estimated at 47. Threats of violence were reported on 145 of the trespassing incidents. Survey respondents indicated the elapsed time between report of an incident of theft, vandalism, or trespassing and response from the Enforcement Agency was less than 3 days 91 percent of the time.

Survey respondents compared crime levels during 2024 to 2020. Fourteen percent of respondents perceived an increase in crime level, 78 percent indicated that crime remained the same, and 8 percent thought crime levels had decreased. Respondents were asked about their level of familiarity with the Hawaii Department of Agriculture's efforts to deter agricultural theft by using ownership and movement certificates. Based on survey results, 64 percent were not familiar, 19 percent were familiar, but had not filled out the certificates, 7 percent were familiar and had completed the certificates, and 10 percent were unspecified.

The results of the survey show that 13 percent of farms in the State suffered theft or vandalism during 2024. Honolulu County suffered the highest rate of theft and/or vandalism at 21 percent of all farms. Hawaii County had the second highest rate at 12 percent. Maui County was third at 11 percent and Kauai had the lowest rate at 9 percent.
