Statistics on Farm Tenure by Annual Farm Sales and Area Operated State of Hawai‘i, 2022

All farms are classified by the USDA according to the tenure of their producers. Full owners operate only on land they own. Part owners operate the land they own and also land they rent from others. Tenants operate only on land they rent from others or work on shares for others. In Hawai‘i, approximately 70% of all farms (4,649 out of 6,569) are Full Owners, followed by 9% Part Owners (558 farms), and 21% Tenants (1,362 farms). As shown in Charts 1 and 2, full ownership declines significantly as annual farm sales and area operated increase.
